EDUCATION

Vellore Institute of Technology, Chennai

B.Tech Computer Science (AI and Robotics)

CGPA: 9.44 / 10.0

Tamil Nadu, India

2024 – 2028

The PSBB Millennium School, Coimbatore

CBSE | Class XII: 95% | Class X: 93.4%

Tamil Nadu, India

2012 – 2024

TECHNICAL SKILLS

Programming Languages	Java, Python, TypeScript, JavaScript, C, C++
Backend & Frameworks	Spring Boot, Spring MVC, Spring Security, Express.js, NestJS, RESTful APIs, WebSockets
Databases & ORM	PostgreSQL, MySQL, MongoDB, Drizzle ORM, Hibernate, Spring Data JPA
Tools & DevOps	Docker, Git, GitHub
AI/ML	LangChain, LangGraph, Scikit-learn, NumPy, Pandas, RAG, Prompt Engineering
Related Coursework	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Soft Skills	Leadership, Problem Solving, Critical Thinking, Team Collaboration

EXPERIENCE

Software Development Intern — Hubino

June 2026

Backend Developer - ServiceHub, a multi-tenant home services marketplace

- Designed the core backend architecture for a multi-tenant home services marketplace within a 3-week MVP sprint — powering a web admin portal and two mobile apps (customer and professional) using Express, TypeScript, Drizzle ORM, and PostgreSQL.
- Designed and implemented a scheduled professional matching service using cron jobs to automatically assign nearby available professionals based on customer location.
- Designed booking lifecycle workflows with real-time booking notifications using Server-Sent Events (SSE), ensuring consistent state transitions across customers, professionals, and operators.

Tech Stack: Express, TypeScript, PostgreSQL, Drizzle ORM, Cron Jobs, React Native

PROJECTS

ExpenseOS — Full-Stack Expense Management System

2026

Mobile and backend app for personal and shared expense management

- Developed a cross-platform expense management system using React Native and Spring Boot, enabling real-time shared cost tracking for 50+ active users.
- Designed and implemented an expense splitting engine supporting balance reconciliation, settlement calculation, and approval-based transaction workflows.
- Delivered 20+ secure APIs with JWT-based authentication, supporting real users with reliable, fast access to their financial data.
- Designed approval-based settlement workflows so payments are reconciled accurately before being marked complete, reducing trust issues between users.

Tech Stack: Spring Boot, Spring Data JPA, Hibernate, PostgreSQL, React Native, Docker, JWT | [GitHub Repo](#)

InsightFlow — AI-Powered CRM & Analytics Platform

2025

Full-stack CRM with real-time analytics dashboards and AI-driven sales insights

- Built a full-stack CRM platform using Spring Boot and MongoDB, supporting end-to-end lead lifecycle management across 4+ pipeline stages with real-time conversion tracking on an interactive React dashboard.
- Delivered 15+ REST APIs secured with JWT and HttpOnly cookies, covering authentication, lead assignment, CRUD operations, and multi-user access control at scale.
- Integrated Gemini API to surface AI-driven sales recommendations alongside Chart.js and Recharts visualizations across 4+ analytics views for conversion rates and team performance.

Tech Stack: Spring Boot, MongoDB, React, JWT, Chart.js, Recharts, Gemini API | [GitHub Repo](#)
